AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-58 (cancelled).

Claim 59 (currently amended): An electric toothbrush, comprising:

a handle with a motor disposed therein that is operatively connected to a drive system,
said drive system comprising a shaft;

a head having a longitudinal axis;

a first bristle holder disposed on said head comprising a first plurality of bristle tufts
disposed thereon, wherein said first bristle holder is operatively connected to said drive
system to oscillate said first bristle holder about an axis substantially perpendicular to said
longitudinal axis; and

a second bristle holder comprising a top surface and a second plurality of bristle tufts,
wherein a plurality of bristle tufts of said second plurality of bristle tufts form an acute
angle with said top surface of said second bristle holder, wherein said second bristle
holder is operatively connected to said drive system to move said second bristle holder in
a generally side-to-side direction, relative to said longitudinal axis;

~~wherein at least one tuft of said second plurality of bristle tufts extends in a direction
toward said handle;~~

~~wherein at least one tuft of said second plurality of bristle tufts extends in a direction
away from said handle; and~~

~~wherein said second plurality of bristle tufts comprises a first bristle tuft and a second
bristle tuft adjacent said first bristle tuft, wherein said first bristle tuft is shorter than said
second bristle tuft.~~

Claim 60 (previously presented): The electric toothbrush of claim 59, wherein said first plurality
of bristle tufts includes a first and second bristle tuft forming an acute angle with said top
surface of said first bristle holder.

Appl. No. 10/676,955
Att. Docket No. 8778CCL
Amdt. Dated December 12, 2005
Reply to Office Action of July 12, 2005
Customer No. 27752

Claim 61 (previously presented): The electric toothbrush of claim 60, wherein said first plurality of bristle tufts includes a third and fourth bristle tuft, wherein said third and fourth bristle tufts are shorter than said first and second bristle tufts of said first plurality of bristle tufts.

Claim 62 (previously presented): The electric toothbrush of claim 61, wherein said third and fourth tufts of said first plurality of bristle tufts are disposed substantially perpendicular to said surface of said first bristle holder.

Claim 63 (currently amended): The electric toothbrush of claim 60, wherein said second plurality of bristle tufts comprise ~~third~~ first and a ~~fourth~~ second bristle tufts, wherein said ~~third~~ first and a ~~fourth~~ second bristle tufts are disposed substantially perpendicular to said surface of said second bristle holder.

Claim 64 (currently amended): The electric toothbrush of claim 59, wherein said second bristle holder ~~reciprocates~~ moves in a linear side-to-side direction along a first axis transverse to said longitudinal axis of said head.

Claim 65 (cancelled).

Claim 66 (previously presented): The electric toothbrush of claim 64, wherein said shaft rotates.

Claim 67 (previously presented): The electric toothbrush of claim 64, wherein said second bristle holder is disposed between said first bristle holder and said handle.

Claim 68 (previously presented): The electric toothbrush of claim 67, wherein said second bristle holder comprises a depending element which depends from a bottom surface of said second bristle holder, wherein said depending element is contacted by, but not fixed to said drive system.

Claim 69 (previously presented): The electric toothbrush of claim 68, wherein said first plurality of bristle tufts includes a first and second bristle tuft forming an acute angle with said top surface of said first bristle holder.

Claim 70 (previously presented): The electric toothbrush of claim 69, wherein said first plurality of bristle tufts includes a third and a fourth bristle tuft, wherein said third and fourth bristle tufts are shorter than said first and second bristle tufts of said first plurality of bristle tufts.

Claim 71 (previously presented): The electric toothbrush of claim 69, wherein said head comprises an aperture and a top surface, wherein said depending element is received through said aperture, and wherein said bottom surface of said second bristle holder contacts said top surface of said head.

Appl. No. 10/676,955
Att. Docket No. 8778CCL
Amdt. Dated December 12, 2005
Reply to Office Action of July 12, 2005
Customer No. 27752

Claim 72 (currently amended): An electric toothbrush, comprising:

a handle with a motor disposed therein that is operatively connected to a drive system,
said drive system comprising a shaft;

a head having a longitudinal axis;

a first bristle holder disposed on said head comprising a first plurality of bristle tufts
disposed thereon, wherein said first bristle holder is operatively connected to said drive
system to oscillate said first bristle holder about ~~an~~ a first axis substantially perpendicular
to said longitudinal axis;

a second bristle holder comprising a top surface and a second plurality of bristle tufts,
wherein at least one bristle tuft of said second plurality of bristle tufts forms an acute
angle with said top surface of said second bristle holder, wherein said second bristle
holder is operatively connected to said drive system to move said second bristle holder
about a second axis transverse to said longitudinal axis of said head and non parallel to
said first axis; and

~~wherein at least one tuft of said second plurality of bristle tufts extends in a direction
away from said handle;~~

wherein said first plurality of bristle tufts includes a first and second bristle tuft forming
an acute angle with said top surface of said first bristle holder; ~~and~~

~~wherein said first plurality of bristle tufts further includes a third and a fourth bristle tuft,
wherein said third and fourth bristle tufts are shorter than said first and second bristle tufts
of said first plurality of bristle tufts.~~

Claim 73 (previously presented): The electric toothbrush of claim 72, wherein at least one tuft of
said second plurality of bristle tufts extends in a direction toward said handle.

Claim 74 (previously presented): The electric toothbrush of claim 73, wherein said second
plurality of bristle tufts comprises a first bristle tuft and a second bristle tuft adjacent said
first bristle tuft, wherein said first bristle tuft is shorter than said second bristle tuft.

Claim 75 (currently amended): The electric toothbrush of claim 72, wherein ~~said~~ third and fourth
bristle tufts of said first plurality of bristle tufts are disposed substantially perpendicular to
said surface of said first bristle holder, wherein said third and fourth bristle tufts are
shorter than said first and second bristle tufts of said first plurality of bristle tufts.

Appl. No. 10/676,955
Att. Docket No. 8778CCL
Amdt. Dated December 12, 2005
Reply to Office Action of July 12, 2005
Customer No. 21752

Claim 76 (currently amended): The electric toothbrush of claim ~~73~~ 74, wherein said second plurality of bristle tufts comprise third and fourth bristle tufts, wherein said third and fourth bristle tufts are disposed substantially perpendicular to said surface of said second bristle holder.

Claim 77 (cancelled).

Claim 78 (cancelled).

Claim 79 (currently amended): The electric toothbrush of claim ~~77~~ 72, wherein said shaft rotates.

Claim 80 (currently amended): The electric toothbrush of claim ~~77~~ 72, wherein said second bristle holder is disposed between said first bristle holder and said handle.

Claim 81 (previously presented): The electric toothbrush of claim 80, wherein said second bristle holder comprises a depending element which depends from a bottom surface of said second bristle holder, wherein said depending element is contacted by, but not fixed to said drive system.

Claim 82 (previously presented): The electric toothbrush of claim 81, wherein at least one tuft of said second plurality of bristle tufts extends in a direction toward said handle.

Claim 83 (previously presented): The electric toothbrush of claim 82, wherein said second plurality of bristle tufts comprises a first bristle tuft and a second bristle tuft adjacent said first bristle tuft, wherein said first bristle tuft is shorter than said second bristle tuft.

Claim 84 (previously presented): The electric toothbrush of claim 82, wherein said head comprises an aperture and a top surface, wherein said depending element is received through said aperture, and wherein said bottom surface of said second bristle holder contacts said top surface of said head.

Claim 85 (cancelled).

Claim 86 (currently amended): A detachable head for use with an electric toothbrush, said detachable head comprising:

an elongate body comprising a head, a drive system, a longitudinal axis, and a first end opposite a second end, wherein said first end may be detachably coupled to the electric toothbrush;

a first bristle holder disposed on said head comprising a first plurality of bristle tufts disposed thereon, wherein said first bristle holder is operatively connected to said drive

Appl. No. 10/676,955
Alt. Docket No. 8778CCL

Customer No. 27752

system to oscillate said first bristle holder about ~~an~~ a first axis substantially perpendicular to said longitudinal axis; and

a second bristle holder comprising a top surface and a second plurality of bristle tufts, wherein at least one bristle tuft of said second plurality of bristle tufts forms an acute angle with said top surface of said second bristle holder, wherein said second bristle holder is operatively connected to said drive system to move said second bristle holder (a) about a second axis transverse to said longitudinal axis of said head and nonparallel to said first axis or (b) in a generally side-to-side direction, relative to said longitudinal axis;

~~wherein at least one tuft of said second plurality of bristle tufts extends in a direction away from said first end; and~~

~~wherein said first plurality of bristle tufts includes a first and second bristle tuft forming an acute angle with said top surface of said first bristle holder; and~~

~~wherein said first bristle tuft of said first plurality of bristle tufts is shorter than said second bristle tuft of said first plurality of bristle tufts.~~

Claim 87 (new): The detachable head of Claim 86, wherein said first plurality of bristle tufts includes a first and second bristle tuft forming an acute angle with said top surface of said first bristle holder.
